By utilizing the light version of text highlighting page videos, Quran.surf introduced 'World Wide Online Qur'an Hifz Program - WWOQHP'. Its 'Guide to Learn' method conducts through lots of WhatsApp groups. These groups are runs

by the persons who already memorized the Holy Quran. Qur'an schools and colleges are also participating on this endeavor. We have been getting registration from different part of the world for this program. If God Bless, it is capable to make thousands of 'Qur'an Memorizers' around the world! Please take a copy of its 62 page guidebook from www.quran.surf/guidebook/. If there are only surah videos, it will not be easy to handle via whatsapp. Our page videos and many supporting things make things easier than imagine. This program also has a method for 'self study'.

There is no need to explain details about the great benefits of memorization of the Holy Quran to them who already memorized the Holy Quran. Anyhow we have summarized it as '15 merits' here: www.quran.surf/merits/.

Quran.surf provides short and easily recognizable URLs to access our posts, YouTube videos and playlists. For example, a teacher could provide the link 'quran.surf/s36/' to weak students in Surah No. 36 Yaseen. Page links and reciters specific short links are also available. This is very impressive for those who are interested in comparative study.
